■■■■■■■■■:The price is for the purchase of two fantastic plots of land in El Chaparral. The plots are side by side with building licenses in place to build two villas, one on each plot. The plots could also be purchased separately or together, or you could buy both plots and build one villa. The design and plans of the villas are available to be viewed. The developers that you could use to build your villa or villas have already completed one villa on the neighbouring plot.
